Our Due Diligence Processes, Risk Assessment & Management for anti-slavery and human trafficking

- **Procurement of goods or services from Mitsubishi Electric Corporation or a member of its group of companies (together “Mitsubishi Electric Group Supplier”):**

We rely on each Mitsubishi Electric Group Supplier’s own due diligence processes for risk assessment and verification and its contractual compliance requirements as applicable to its sub-contractors to support compliance within the procurement supply chain.

As part of these processes, Mitsubishi Electric Europe B.V. and Mitsubishi Electric Group Supplier each apply:

(i) the Mitsubishi Electric Group Human Rights Policy, as implemented on 20 September 2017: This confirms that protection of human rights and support for internationally agreed human rights are imperatives for the Mitsubishi Electric Group’s business activities. Accordingly, as members of the Group, we recognize our duty to prevent any complicity with human rights violations. Our policy commitment includes the following:

- The Mitsubishi Electric Group recognises that, as a minimum, it must respect international standards related to human rights, such as the International Bill of Human Rights and the International Labour Organisation’s Declaration on Fundamental Principles and Rights at Work. On that basis, we shall respect human rights while making sure to adequately understand relevant laws and regulations in every country and region where we do business. If such laws and regulations do not conform to international standards related to human rights, we shall consult with local authorities on how to properly handle cases involving human rights in order to respect the international standards.
- Based on the United Nations Guiding Principles on Business and Human Rights, the Mitsubishi Electric Group shall undertake human rights due diligence measures, such as specifying and assessing the impact of its business activities on human rights, and studying ways of proactively preventing or mitigating any negative impact of those activities. Furthermore, the Group shall put a framework in place for rectifying any cases in which its business activities are found to have negatively impacted human rights, or its members are found to have been clearly involved in violations of human rights.

- The Mitsubishi Electric Group has identified CSR (Corporate Social Responsibility) materialities, has set concrete tasks and goals for those materialities, and works to achieve them, and, through that process, takes steps to ascertain the status of its initiatives related to respect for human rights, and properly discloses its findings.
- The Mitsubishi Electric Group shall work to ensure that its initiatives related to respect for human rights are implemented with the participation of all executives and employees. Furthermore, the Group shall request cooperation from various stakeholders involved in its whole value chains such as business activities, products, and services, in order to help promote respect for human rights in society at large.
- The Mitsubishi Electric Group shall implement training programs and awareness campaigns on a continuous basis for the purpose of ensuring that all executives and members of the Group understand initiatives related to respect for human rights, and conduct themselves accordingly.

Respect for Human Rights:

“1. We respect human rights and ensure we adequately understand relevant laws and regulations of the countries and regions in which we conduct business. We strive not to violate any human rights.

2. We request cooperation from various stakeholders involved in the whole value chains of our business activities, products and services to help promote respect for human rights in society at large.

3. During the term:

- Mitsubishi Electric Corporation completed CSR evaluation surveys with a significant number of existing and new suppliers; resulting in a number of suppliers being given guidance to encourage their subcontractor suppliers to take up CSR compliance practices.

Under globally sustainable procurement, target costing and cost co-creation by enhancement of partnership (G-STEP) strategy toward strengthening the purchasing structure, the Mitsubishi Electric Group aims to achieve the lowest cost ratio ever starting in fiscal 2021. In this effort, we will develop and promote the following measures with the following aim: "We will contribute to the realization of

sustainability through all corporate activities. By doing so, we will make further efforts to enhance economic and social value so as to raise our corporate value," which is the Group's business goal, through sustainable and stable procurement. In cooperation with the Materials Planning Office in regional corporate offices in China, Asia, Europe and the Americas, we implement purchasing strategies through conferences of procurement officers and other such meetings to promote optimal procurement activities suited to each region.

In addition to this initiative, we will also promote activities to mitigate any perceived risks regarding a range of issues related to labour practices and environmental problems in the procurement supply chain and thereby strengthen our business continuity plan (BCP).

- **Procurement of goods and services from third party suppliers**

We apply a proportionate approach to our due diligence processes for risk assessment and verification with regard to slavery and human trafficking.

For our risk assessment we take into account the relevant products, components, packaging materials and services, production location and supply chain data.

We also take into account a supplier's self-declaration of compliance and any compliance policy and/or other compliance representations.

Should we identify any higher risk supplier then we would consider deeper verification processes to assess compliance and for remedy of any non-compliance.

During the term:

- Mitsubishi Electric Corporation have continued to issue its suppliers and procurement partners with consent forms for the CSR Procurement Guidelines, these ask for information pertaining to understanding and mitigating serious human rights risks in the supply chain (forced labor of foreign laborers, dangerous or hazardous labour, etc.);
- In addition to the investigations in progress as a result of responses to the consent forms, we apply an additional check sheet to discern the existence of human rights violations, and conduct activities aimed toward mitigating those issues;
- We received signatures for the consent forms for the CSR Procurement Guidelines from a total of about 2,800 suppliers, and will continue to seek to obtain consent forms from suppliers that have yet to respond and new suppliers during the balance of the fiscal year.
